

Grace Egeland, Ph.D.

Prof. Egeland, epidemiologist with the Norwegian Institute of Public Health, holds a secondary appointment with the University of Bergen, Lifestyle Epidemiology Research Group of the Department of Global Public Health and Primary Care. She formerly worked with McGill University's Centre for Indigenous Peoples' Nutrition and Environment (Montreal) and McGill's School of Dietetics and Human Nutrition where she held a Canada Research Chair (2002-2011). In addition to her background in chronic disease and nutritional epidemiology, she has experience in participatory research methods with Indigenous Peoples where she led several research initiatives, including the International Polar Year Inuit Health Survey. Her public health background includes service for the US Centers for Disease Control and the State of Alaska. She received her Ph.D. in chronic disease epidemiology from the University of Pittsburgh's School of Public Health in 1989.
