

**Inger Elisabeth Måren**

**inger.maaren@geog.uib.no**

Inger Elisabeth Måren is a Postdoc at the Department of Geography, University of Bergen, on the project '*Land-use Change and the Himalayan Agro-Ecological System: Limitation or Adaptation?*' Her background is in quantitative plant ecology. Her research interests focus on anthropogenic disturbance regimes and secondary succession; specifically the impacts of biological invasions and management techniques such as cutting, lopping, burning and grazing on spatial and temporal vegetation dynamics in semi-natural landscapes. Her work includes examples of land use change in the global South, as well as in the global North. This year she is the scientific coordinator of the BSRS 2013.
