

Keshav Prasad Paudel

keshav.paudel@geog.uib.no

Keshav Prasad Paudel is a postdoctoral researcher fellow at the Department of Geography, University of Bergen. He has worked on aspects of climate change, agro-pastoral production system, and landuse dynamics in the Himalaya. His scientific approach is a triangulation of several sets of methods, combining remote sensing/GIS analysis, modeling, field observation and measurement, and ethnographic research method. He involved as a team leader in a research project funded by Provention Consortium. He had served as a consultant in various organizations like WWF Nepal, ICIOMOD and UNDP/Nepal.
